

EDUCATION

- | | |
|---|-----------------------------|
| 1. Worcester Polytechnic Institute
<i>Master of Science in Data Science - GPA: 4.00</i> | Aug 2025 – May 2027 |
| 2. Narsee Monjee Institute of Management Studies
<i>Bachelor's of Science in Applied Statistics and Analytics - GPA: 2.95</i> | July 2017 – May 2021 |

TECHNICAL SKILLS

Programming & HPC: Python, .NET/C#, Java, Julia, SQL, Bash/PowerShell, Slurm, CUDA, C++
Automation Testing: PyTest, Selenium, Playwright, Appium, SpecFlow, Cucumber, Postman
Backend & Databases: FastAPI, Flask, Django, MySQL, PostgreSQL, MongoDB, SQL Server, DynamoDB, Mem0
Cloud & DevOps: AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Terraform, CI/CD, Redis
Generative AI & Machine Learning: PySpark, Pandas, Scikit-learn, Tableau, Power BI, LLMs, NLP, RAG, vLLM, Langchain, CrewAI, Langgraph, DSPy ollama, RAG, Statistical Modeling
Project Management: Agile, Scrum, Jira, SDLC, 21 CFR Part 11 Compliance, UAT, SOP drafting.

EXPERIENCE

xLM Continuous Validation - (2021-2025)

- | | |
|--|----------------------------|
| 1. Lead Software Engineer - AI
<ul style="list-style-type: none">Led a cross-functional team of five ML, frontend, and backend engineers to deliver the cIV AI-driven Test Automation Platform by architecting Retrieval-Augmented Generation (RAG) and prompt-engineering workflows—leveraging LLMs, VLMs, CrewAI, LangGraph, and vector databases—that cut manual test-authoring effort by 90% while ensuring full 21 CFR Part 11 compliance.Designed GPU-accelerated inference services with PyTorch and vLLM, served via low-latency APIs on AWS and Azure; implemented robust data-cleaning, statistical-analysis, and qualitative/quantitative evaluation loops to verify model outputs.Instrumented Git/GitHub-based CI/CD pipelines (Azure DevOps) and automated release governance; drafted SOPs that standardized version control and code review processes.Orchestrated scalable device-farm infrastructure on Kubernetes/Selenium Grid, enabling parallel experimentation.Lead the migration of legacy Microsoft SQL Server database (physical) to cloud databases. Worked with large scale of data during the migration and have written extensive powershell scripts to complete the migration.Coordinated timelines and deliverables across cloud, product, and regulatory teams; regularly communicated technical findings to executives, auditors.Drafted and implemented company-wide SOPs for version control and release management, standardizing processes across products. | Nov 2023 – Jul 2025 |
| 2. SDET II
<ul style="list-style-type: none">Designed end-to-end automation frameworks with Selenium, Playwright, and SpecFlow for enterprise applications, cutting deployment cycles by 40%.Led development and maintenance of xLMCore NuGet package (v0.0.1 to v2.0.15), the core engine for GxP test automation and validation reporting.Integrated test suites into CI/CD pipelines using Azure DevOps and Docker, enabling continuous testing and deployment.Developed Jira and Azure DevOps integration, enhancing project visibility and eliminating duplicate reporting.Conducted API testing with Postman and custom scripts, ensuring data integrity and system reliability. | Sep 2022 – Oct 2023 |
| 3. SDET I
<ul style="list-style-type: none">Performed UAT and API Testing using SpecFlow to ensure 21 CFR Part 11 compliance and reduce validation timelines, while automating validation for enterprise applications (Veeva, Sage, Rhythm) using Selenium, Appium, and WinAppDriver.Established an end-to-end reporting pipeline with automated data ingestion integrated with xLMCore, and deployed a live Power BI dashboard to provide real-time test execution visibility and enable data-driven decision-making across teams. | Jul 2021 – Aug 2022 |

CERTIFICATES

Azure DevOps - AZ900	Jan 2024
Certified Scrum Developer	Aug 2022
Software Development Processes and Methodologies	July 2021

PROJECTS

- | | |
|---|----------------------------|
| Sentiment Based Trading System <i>Python, FastAPI, BERT, Selenium</i>
<ul style="list-style-type: none">AI system combining news sentiment (BERT model) with technical indicators (EMA) for intraday signals.Automated news scraping; backtested achieved 2.6% daily profit with 1:2.5 risk-reward ratio. | Feb 2021 – Mar 2021 |
| Decision-support App for Traders <i>Python, Flask, Design Patterns</i>
<ul style="list-style-type: none">Flask-based stock screener detecting candlestick patterns; used Factory/Observer/MVC patterns for scalability.Reduced manual chart-scanning effort with pattern-first search capability. | Nov 2020 – Dec 2020 |
